This presentation and the accompanying slides (the "Presentation"), by **Genus Power Infrastructures Limited** (the "Company"), have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment what so ever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company's market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the industry in India and world-wide, competition, the company's ability to successfully implement its strategy, the Company's future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company's market preferences and its exposure to market risks, as well as other risks. The Company's actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Company and the Company is not responsible for such third party statements and projections.

Genus FY20: Performance Highlights

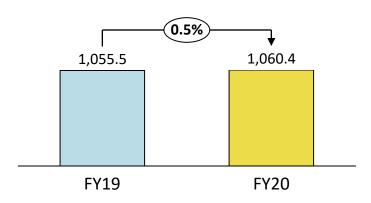

Key Highlights

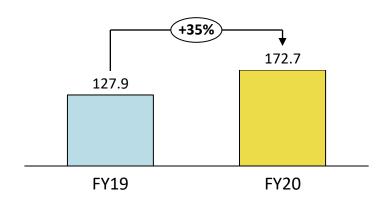

Healthy Profitability driven by

- Higher share of Export Orders
- **Better Product Mix**
- **Benign Raw Material Prices**

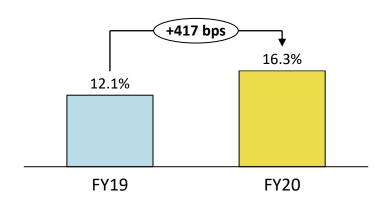

Revenue (Rs. Crores)

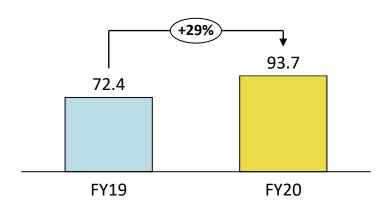

EBITDA (Rs. Crores)

EBITDA Margin (%)

PAT (Rs. Crores)

Genus Q4 FY20: Performance Highlights

Key Highlights

Q4FY20 Performance impacted by

- COVID-19 led Lockdown
- Delay in Dispatches of Finished Goods
- Deferred Revenue Recognition

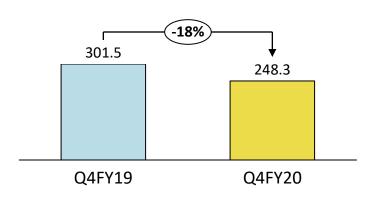

However margins improved on account of

- Easing in Raw Material Prices
- Improvement in Operating **Efficiency**
- Better Product Mix

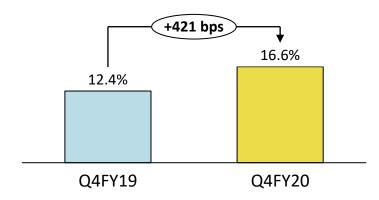

In FY20, our team has won 17 awards at the "Quality Circle Forum of India" Haridwar Chapter and Lucknow Chapter

- 1) 11 Gold
- 2) 4 Silver
- 3) 2 Bronze

Strong Demand for various types of Meter across State Electricity Boards & Private

Players

Genus uniquely positioned to suffice needs of the rising demand of Meters

Management Commentary

"COVID-19 led lockdown impacted our Q4FY20 performance as it resulted in delay in dispatches of finished goods and therefore revenue recognition. Overall Order inflow was subdued in FY20, as State Electricity Boards are in transition mode from conventional meters to smart meters coupled with our focus on ensuring security of payment as against revenue buildup.

Going forward we expect, the pace of ordering of Smart meters to pick up sharply. There is likely to be no significant impact on the demand side due to COVID-19, as the state and central governments are persistently striving for reforms in the power sector, with focus on reducing aggregate technical and commercial (AT&C) losses by installation of smart meters.

With the Government putting in place the world's strictest lockdown from end-March '20, the power consumption from Industries and Commercial customers nose-dived. This is likely to strain the already weak finances of DISCOMs. However, measures like payment of state government department dues and funding from NBFCs such as PFC and REC may help alleviate liquidity issues at distribution companies.

At the same time, Smart Meters have proved their worth during lockdown, as it helped curtailed the losses for the DISCOMs that had adopted them. For example, in Uttar Pradesh, 95% of smart meter consumers have been billed during the lockdown, as against just 29% for the rest. The DISCOMs using smart meters have seen 15-20% average increase in monthly revenue per consumer, according to the Energy Efficiency Services (EESL), showcasing a wide chasm between smart meter users and otherwise, highlighting their remarkable efficacy.

The distribution sector is the weakest link in the entire power value chain and greatly affects power generation companies. Current AT&C losses stand at about 18-19% versus 22% during 2015-16. In the coming quarters, we expect the Government to fine tune the proposed Atal Distribution System Improvement Yojana (Aditya Scheme), which primarily involves the implementation of compulsory prepaid smart meters for 250 million households with an aim on lowering AT&C losses of DISCOMs to 12%. The proposed Electricity Bill 2020 may also usher in a major distribution reform. However, at the same time, these reform measures may get delayed if Covid-19 sustains over a long period of time.

We provide end-to-end metering solutions to clients with metering communication, services and solutions. We plan to create inroads, in areas where we have robust avenues of earning recurring revenue in form of facility management system (FMS), providing our domain-related software to clients etc."

Mr. Jitendra Kumar Agarwal, Joint Managing Director

Business Overview

Genus Power Sector Leadership

- Incorporated in 1992, Part of \$400 mn Kailash Group
- Over 2 decades of experience in electricity metering solutions industry

- Largest player in India's electricity meter industry
- ~27% market share in Meter Industry
- ~70% market share in Smart Meters
- Share of Metering Projects increasing

- Empanelled with 40+ different utilities across the country
- 60 mn+ Meters installed
- Capability to undertake turnkey power projects up to 400 KV

- Top-notch In-house R&D recognized by Govt of India
- 25,000 Sq. Mtrs of Integrated Manufacturing
- Annual Production capacity of 10 mn+ meters

- Production of **Electronic Energy** Meters
- Established Single & Three Phase **Electronic Energy** Meters
- Multi-functional & Multi-tariff Meters launched

1996 - 1999

- AMR / Pre-payment Meter/ DT Meter launched
- Ventured into **Power Distribution** Management Projects
- Manufacturing facility at Haridwar commissioned 2005 - 2009

- Deployed Smart Metering Solution at Shapur (Junagarh) PGVCL - India's First Smart Village Project
- Implemented India's first End to End Smart Metering Solution at Kala Amb HPSEB's Smart Grid Pilot Project with Alstom

2014 - 2016

- India's First Narrowband -IOT setup for AMI with Vodafone Idea
- Among the Top 10 Global AMI Companies as per IHS Markit's Electricity Meters Report - Edition 2018
- Smart Meter Integrated line getting operational

2018 - 2019

1992 - 1995

- Company founded for manufacturing Thick Film Hybrid Microcircuits & SMT **PCB** Assemblies
- First Production facility set up in Sitapura, Jaipur

2000 - 2004

- R&D recognized by Government of India
- Lean Manufacturing with help of TBM consultants, USA
- Increased product range of electronic energy meters

2010 - 2013

Launched meter with integrated APFC, Smart Meters, smart street light management system, Group Metering etc

2017 - 2018

- Intelligent Group Metering systems deployed at BSES
- Smart Meters order from EESL for supply of 13.5 lakh meters
- Only Indian company to receive BIS certification for **Smart Meters**
- Set up and Commenced production at Assam plant

Meter Installed

Till 1998 **Till 2003 Till 2006** Till 2010 Till 2014 Till 2018 0000 0000 0000 0000 0000 0000 100,000 10,000,000 30,000,000 50,000,000 2,500,000 5,000,000

Genus Experienced Management Team

Mr. Ishwar Chand Agarwal **Executive Chairman**

Mr. Kailash Chandra Agarwal Vice-Chairman, Non-Executive, Non-Independent

Mr. Rajendra Kumar Agarwal Managing Director and CEO

Mr. Jitendra Kumar Agarwal Joint Managing Director

Dr. Giriraj Nyati **COO - Metering Solution**

Mr. R Viswanathan **Chief Management** Representative

Mr. N L Nama **Chief Financial Officer**

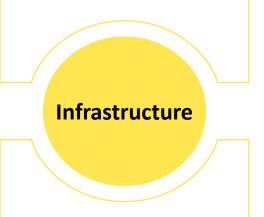

Dr. Anukram Mishra **Chief Technical Officer**

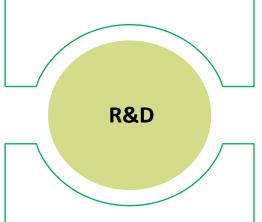

Mr. Ranvir Singh Rathore Senior VP – Domestic Marketing and Sales

CAD, Dies and Mold designs, Molding, Automated SMT lines, Lean Assembly techniques and the state-ofthe-art manufacturing facilities with complete forward and backward integration

In-house R&D Centre, recognised by Ministry of Science and Technology, the Government of India and accredited by National Accreditation Body for **Testing Labs**

Certifications

CMMI level 3 Company Accredited with - ISI, KEMA, SGS, STS, ZIGBEE, UL, DLMS etc., which is amongst the highest in Indian Metering **Solutions Industry**

Armed with long-term, highly-experienced and best-in-class technologist, engineers and executives

US Business Verticals

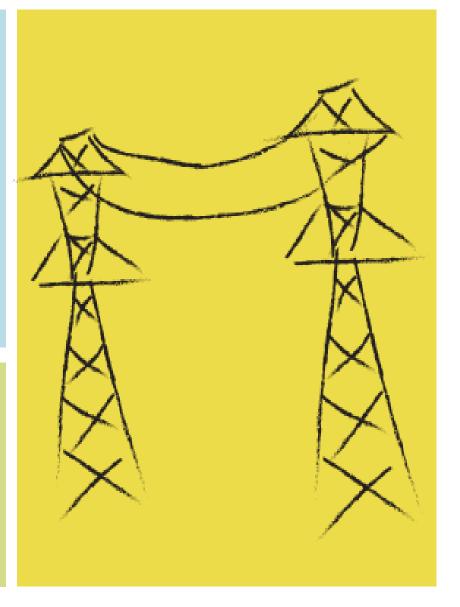

SMART METERING SOLUTIONS

Offers a wide spectrum of Smart Metering Solutions, that includes High End Multifunction Single Phase and Three Phase Meters, CT Operated Meters & HES (Head End System), ABT & Grid Meters, Distribution Transformer (DT Meters), Pre-payment Meters, Group Metering, Smart Street Light Management Solution, Net- Metering Solution for rooftop Solar, Data Concentrator, Energy Management solution for Building Management and DC Metering Solution, Gas Meter etc

Genus specializes in providing end-to-end metering solutions (AMI) with communication modules and software under its Smart Energy Management Solution

ENGINEERING, CONSTRUCTIONS AND CONTRACTS (ECC)

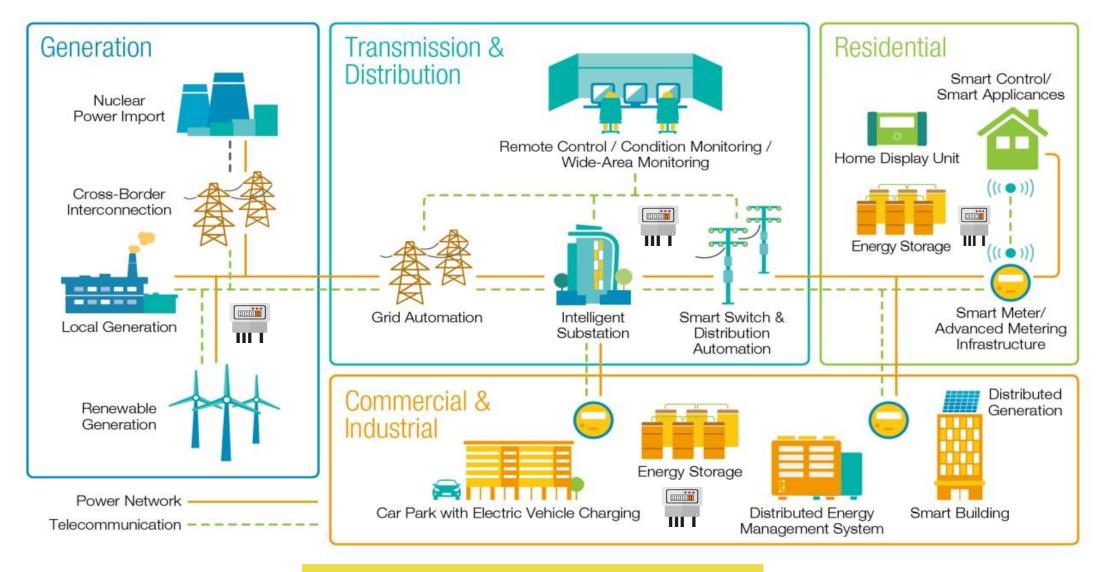

- Customized and turnkey (ECC) solutions to the Power Transmission and Distribution (T&D) sector
- Under the turnkey ECC solutions, Genus offers One Stop Total Solution of Metering, Engineering & Construction from 'Concept to Commissioning' with distinctive specialization in Smart Metering Solution & Advance Metering Infrastructure

End to End Energy Management Solutions

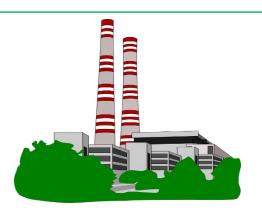

Enus Diversified Product – Market Mix

RESIDENTIAL & COMMERCIAL

- Meters with communication capability
- Single / Three Phase Smart
 Meters
- Net Meters
- Smart Street Light Management System
- Group Metering

INDUSTRIAL

- LT / HT CT Meter with Integrated Communication
- Meters with Automatic Power Factor Controller
- ABT Meter
- Smart High end Meters

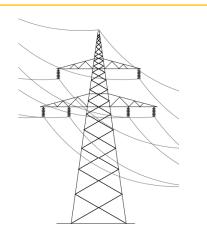

PREPAYMENT SOLUTION

- Single Phase Prepayment Meter
- Three Phase Prepayment Meter
- Dual prepayment Solution
- DIN Rail Prepayment Meter
- Prepaid Vending Software
- On-Line "Pre-paid" Metering Solution

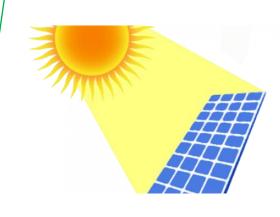

Genus Diversified Product – Market Mix

DISTRIBUTION TRANSFORMER

- **Thread Through Metering** Solution for Distribution Transformer
- Smart DT Meter with **Integrated Communication**

OPEN ACCESS / GRID

Grid & Sub-Station Meter (ABT Complaint)

CALIBRATION EQUIPMENT

- Single Phase Portable Reference Meter
- Three Phase Portable Reference Meter

Engineering Construction & Contracts

ECC Division

- Provides total engineering and construction solution from "Concept to Commissioning"
- Offers turnkey solutions of MV, HV & EHV sub-stations & transmission lines and execute turnkey jobs up to 420 KV

Leveraging on Strength

- More than 20 years of experience in Indian Power distribution sector
- Engineered Energy meter solutions backed up with in-house R&D and technological prowess

Complements the Metering Business

- increased implementation of Smart metering solution
- Higher sales growth under metering division
- Margin expansion
- Gain Market share

Current Projects under implementation

- 132 KV D/C transmission line and substation in Jharkhand
- Rural electrification work (including feeder segregation) in Western UP under DDUGJY scheme

Balanced Client Mix

Manufacturing Assets at Glance

R&D Centre and Corporate Office, Sitapura, Jaipur

Haridwar, Uttaranchal

Haridwar, Uttaranchal

Guwahati, Assam

Recognized By The Ministry of Science and Technology, Government of India

In-House NABL Accredited Electronic Energy Meter Testing Laboratories

A series of reliability tests are conducted periodically both on in-house reliability chambers and from NABL approved outside test labs, to establish a satisfactory life of the product in the hands of the customer.

Quality is the hallmark of Genus products and services

Comprehensive testing is carried out at various stages of product manufacturing starting from incoming raw material/components to in-process stages and to the final finished and packed product

Quality Certifications

CMMI Level 3 Company

STS certification

Bureau Veritas

QSI Certification

National Accreditation Board for Testing and Calibration Laboratories

KEMA Certification

R&D Lab recognized by MSD, GOI

Silver Certificate by Frost & Sullivan

IEC Certifications

ZigBee Certification

STQC Certifications

DLMS Certification for Meters

EMC Certifications

IECQ for quality of components

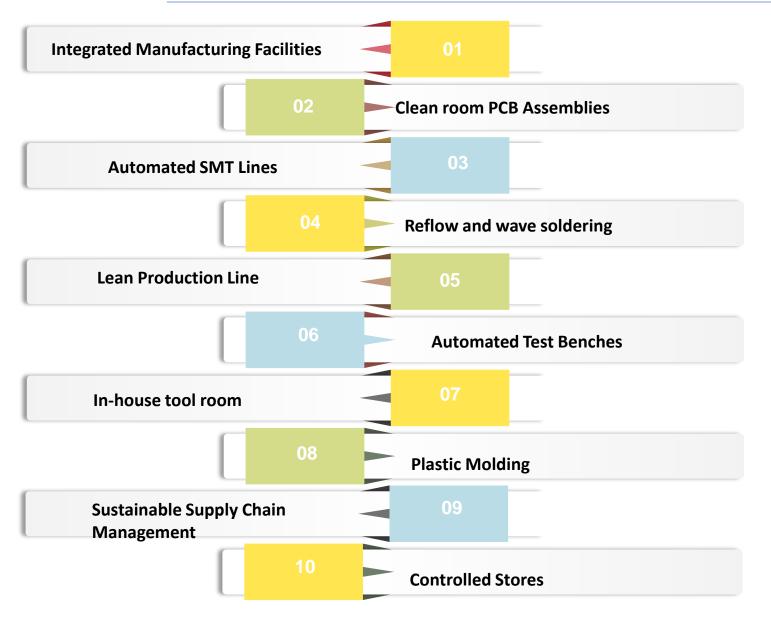

C-DOT Certifications

Genus Infrastructure & Testing Capabilities

In-house Technology product since inception

Truly "Made in India"

- **Quality Assurance**
- **Innovation & R&D**
- In-House NABL Accredited Electronic **Energy Meter Testing Laboratories** (recognized by Ministry of Science & Technology, Govt. of India)
- **Lean Manufacturing**

Qualified & Capable to service the evergrowing power sector demand by adhering to stringent protocol

Key Awards Received

2000:

Rated as 7th turnaround company of India by Business World, India

2013:

The prestigious EFY Reader's choice top
5 brands

2015:

"Silver Certificate of Merit" by Frost & Sullivan's India Manufacturing Excellence Awards 2015

2004:

Rated among top 100 Electronic companies in India by EFY

2018:

The Global Center of Excellence at Jaipur for the successful testing & integration of Genus Smart Electricity Meter Solution in the Living Lab in Jaipur

2011:

Outstanding performance award by NDPL towards AT&C loss reduction

2015:

Accorded Excellence in Quality by Golden Peacock National Quality Awards, 2015

2018:

Quality team won 7 Gold & 3 Silvers in 32nd National Convention Quality Circle Awards organised by "Quality Circle Forum of India" at Gwalior & Haridwar

2019-20:

Recognition from CESC for "Active Involvement in Development of Smart Meters"

Our Multiple Team won 17 Awards (11 Gold; 04 Silver; 02 Bronze) in Lucknow

Center Convention, Haridwar Center Convention and Kaizen Competition on

Quality Circle Forum of India

2019-20:

"Best Innovation Award" and "Brand Ambassador 2020 Award" by Alleem Business Congress, UAE

Ranked among "Top 25 Most Trusted Manufacturing Companies in India" by the CEO Magazine

Business Outlook

Enus AT&C Losses in India are Three Times the Deficit

 Theft is the one of the main causes of the high losses. Theft occurs in several ways, viz: by tapping power lines and tempering / by-passing meter etc

- Meters play a vital role in reduction of AT&C Losses
 - Replacement of defective meters by tamper proof electronic meters / smart meters
 - AMI / Smart metering to the consumer for reduction of commercial losses and billing and collection ease
- Smart meter has the following capabilities:
 - Smart Meters and AMI Meters have communication capability
 - It can register real time or near real time consumption of electricity or export both.
 - Read the meter both locally or remotely
 - Remote connection or disconnection of electricity
 - Remote communication facilities through GSM / GPRS / RF etc

Government's Thrust on Metered Power for All

- DISCOMS had accumulated losses of Rs. 3.8 Trillion and Debt of Rs. 4.3 Trillion
- To improve the operational efficiency and reduce AT&C losses
- Smart Metering solutions, upgradation of transformers and meters
- Improved financial health of DISCOM's would help in lower operating cost and reduce working capital cycle of equipment suppliers
- Till date 27 states and 5 UT has participated in the scheme

Integrated Power Development Scheme

A Priority Programme of Govt. of India

- Planned outlay of Rs. 326 Billion
- Strengthening of sub-transmission network to reduce AT&C losses
- Metering & implementation of IT application to reduce commercial losses
- Smart Meters be installed for all consumers with consumption of above 200 units by 2019

DEENDAYAL UPADHYAYA GRAM JYOTI YOJANA (Scheme of Govt. of India for Rural Areas)

- Planned outlay of Rs. 760 Billion
- Electrification to all villages
- Feeder separation (Rural households & agricultural)
- Strengthening of sub-transmission & distribution infrastructure including metering at all levels (input points, feeders and distribution transformers)
- Metering to reduce the Losses

Source: Various Article

Genus Atal Distribution System Improvement Yojana (ADITYA)

- Ujwal DISCOM Assurance Yojna (UDAY) has expired in March 2020. Thus Atal Distribution System Improvement Yojana (ADITYA) is being considered by the Government of India aimed at investing funds in network infrastructure like smart meters to reduce DISCOM losses
- The new scheme aims to reduce AT&C losses of DISCOMs to less than 12% and reduction in ACS-ARR gaps to 0 as per the laid down trajectory
- The new scheme will have central funding of up to Rs. 1.1 trillion (USD 16.3 billion) over three phases and remaining balance of Rs. 2.9 trillion (USD 42.5 billion) will be funded by states
- PFC and its subsidiaries would be the nodal agency for implementation
- In its design to date, the scheme is planned to install smart meters in the first phase, starting from electricity feeders and then reaching consumers
- In the second phase, the plan is to install insulated aerial bunched cables to prevent electricity theft with hooks, separate feeders for agricultural and household consumption, and supervisory control and data acquisition systems for better monitoring and consumer experience
- Further, state DISCOMs will be able to adopt various business models, such as public-private partnerships, multiple supply and network franchisees or working through input-based distribution franchisees
- Though ADITYA's exact status is not yet clear, however, with a large power sector budget in FY21, it is possible that it will be re-tooled to help the power sector cope with impacts of the COVID-19 crisis

Scheme Structure

Part A

- Provisioning of **Smart Metering Ecosystem** across country at distribution level
- Starting from feeders down to the level of consumers

Part B

- Loss Reduction i.e. Agriculture feeder segregation
- ABC Cabling
- SCADA with DMS functionality
- Augmentation of existing Infra

Part C

- Capacity Building in frontier technologies like Smart grid
- Institutional capacity building

- Part-A scheme is compulsory to take the advantages of Part-B scheme.
- The DISCOM wise DPR of Part-A consists of total no. of consumers, feeders, DTs etc.

Source: Various Articles

Metering Opportunity

As per the, notification by power ministry, dated 8th September 2016 :

- Mandatory rollout of Smart Meters, for consumers with monthly consumption of 500 units and more
- Mandatory rollout of Smart Meters, for consumers with monthly consumption of 200 units and more
- Current Power minister Mr R. K. Singh has extended deadline to end of FY22

METERING OPPORTUNITY

india has 200 million legacy meters

There are plans to install up to 130 million smart meters by 2021

GOVERNMENT INVESTMENT

- The government is planning to invest up to \$21 billion till 2025 in smart grid technologies
- The smart cities initiative is targeting 100+ cities in India, out of which 20 have been declared and work for them will start in the next month or two
- More than 14 smart grid pilots have been launched in cities across India, to push smart solutions in Power Generation & Distribution Industry

Smart Meter is the Future

Latching Switch

Smart meters will have a kill switch which will close off the utility supply. The kill switch will be operated via Internet. This will give power to utility providers to start and stop the supply at the click of a button

Increased customer involvement

As all the data collected will be uploaded on the Internet the customers will be able to access it using their smart phones application. This will give them a clear idea about daily, hourly and even per-minute consumption, and how it is billed

Prepaid Schemes

Customers will be able to recharge their meters to the amount of energy usage and consume only that much. As the meters are smart, they will remind the consumer when the balance is running low, or when a larger than normal chunk is being used. This will help consumers save money, and take the load of billing off the local body

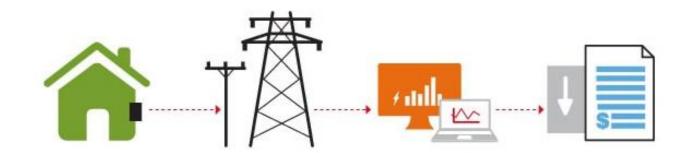

Consumption Patterns

As consumers will be able to access the data on their mobile phones / tablets / PCs, they will be able to cut their expenses using simple strategies. For example not using water heaters or electric irons during peak hour

What are Smart Meters?

Smart meters are remarkably different from electronic meters. While electronic meters only measure the amount of utility used, a smart meter is used to measure the utility and then transmit the reading without any human intervention

- ✓ Allowing utilities to introduce different prices for different consumption during different season
- ✓ Control devices with two-way communication between the meter and the central system
